

## SERVICING YOUR ANILOX SYSTEM

ANILOX METERING TECHNOLOGY offer a thorough Service and Overhaul of your Anilox Unit to ensure that it continues to run to it's full potential. Anilox Metering Technology's experts have experience of over 350 installations and conversions throughout the world, indeed, Managing Director Steve Jacombs was the designer of the Original Anilox System over 20 years ago.

Our Skilled technicians will complete an in-depth clean of the Anilox Unit, replace any Bearings and Handles found to be worn, thoroughly inspect all Anilox Rollers before re-building the Unit to its best specifications. We also include an in-depth consultation with our experts who will recommend ways to further improve the efficiency of the system and advise on replacement parts that may be needed or become necessary in the near future.

### **This Complete Service Includes;**

**Flights and 2 nights accommodation for AMT experts**

**A total strip down and thorough cleaning of the Anilox Unit**

**Replacement of any worn Bearings and Handles**

**A thorough inspection of your Anilox Rollers**

**Complete re-build of your Anilox Unit**

**An in-depth consultation with an Anilox System expert**

**Recommendation of any spare parts needed**

**Full written report on completion**

The service takes approximately 2 days and will have your Anilox System running like new, leading to an increased efficiency on your Unit. Anilox Metering Technology recommends Servicing your Anilox Unit every 2 years to keep the Unit running to its full potential
