

ANILOX SCRAPER BLADES

Anilox Metering Technology supply Scraper Blades for all Makes and Models of Coating Machine. Scraper Blades can be supplied in either Thick Plastic, Thin Plastic or Steel and will be custom made to suit you Coating Machine. The Blades work by scraping the Coating from the surface of the Anilox Roller and ensuring the Coating is of the correct uniform thickness throughout the surface area of the Anilox Roller

Technical Specification

The Plastic Scraper blades are manufactured using Polyester whilst the Steel Blades use Blue Carbon Steel

THICK PLASTIC BLADE

1mm Thick, 35mm or 45mm Wide with a 30 degree Bevel

THIN PLASTIC BLADE

0.5mm Thick, 35mm or 45mm wide without Bevel

STEEL BLADE

0.15mm Thick, 35mm or 45mm wide with a 30 degree Bevel

Anilox Metering Technology always have Scraper Blades in stock enabling a rapid turnaround time from placing the order to receiving the Blades anywhere in the world. Typically shipping costs are low due to the lightweight nature of the blades.

Should you require a quotation for the Scraper Blades or to place an order please do not hesitate to contact us and we will do all we can to help.
